Projects

Resume Analyzer- AI-Powered Resume Matching Platform ([Link](#))

Tech Stack: Next.js, MongoDB, Google GenAI(Gemini-2.5), Tailwind CSS, Vercel.

- Developed an intelligent resume analysis platform that uses Google Gemini (GenAI) to match uploaded resumes with job descriptions, providing AI-generated summaries, skill matches, and improvement tips.
- Recruiters can upload multiple resumes at once — no need to analyze them individually.
- Addressed recruiter pain points like skill mismatch, keyword absence, and poor formatting by automating resume feedback.

Personal Portfolio ([Link](#))

Tech Stack: Next.js, Nodemailer, Render, Vercel

- Integrated an interactive **chatbot** into my portfolio for real-time responses and easy communication.
- Created a responsive personal portfolio showcasing projects and skills successfully deployed over Vercel and Render.
- Implemented a dynamic contact form with backend email notification functionality.

Tasveerbazaar -Image Searcher Web App ([Link](#))

Tech Stack: React, Node.js, Express, Passport.js, Unsplash API

- Developed a full-stack image search web app using React, Node.js, and Unsplash API with Passport.js-based OAuth authentication.
- Optimized performance with debounced API requests and built a responsive UI using Tailwind CSS.
- Implemented search history tracking and a top-5 dropdown feature to enhance user experience.
